

## QUALITY AND ENVIROMENTAL POLICY

---

CYO has integrated quality and environmental management appropriate to the nature, magnitude and environmental impacts in the activity of Design, Manufacture and Assembly of Industrial Machinery.

It provides a framework for setting and reviewing quality, environmental and environmental objectives and targets.

Quality management is documented, implemented and maintained on a regular basis..

It is communicated to all people working for the organization and understood within it, being everyone's responsibility the mandatory compliance with the quality and environmental management system.

It is reviewed for continuing suitability (annually by the Management Committee) and is made available to stakeholders and the public.

On the other hand, and in order to fulfill the objectives, CYO establishes a documented management system of the Process Map, Quality and Environmental Management Manual, Technical Procedures, Technical Instructions and Process Sheets. All this in accordance with the requirements of the UNE EN ISO 9001 and UNE EN ISO 14001 standards in force for the scope of "DESIGN, MANUFACTURING AND ASSEMBLY OF INDUSTRIAL MACHINERY".

### CYO Quality and Environmental Policy

CYO's Quality and Environmental policy is characterized by a permanent dedication to continuous improvement in our Industrial Machinery Design and Assembly activities.

CYO's mission is to satisfy the needs of the market, providing a service with a competitive price, quality and deadlines and being an innovative and professionally attractive company. We are an organization with great capacity for teamwork and sensitized to quality and environmental management.

We are committed to continuous improvement, and to this end we understand that it is essential to raise awareness, sensitization and participation of all company personnel, whose actions must be channeled so that the services provided meet the needs and expectations, specifications and requirements of our customers and other interested parties. And all this while minimizing the undesired effects associated with the risks and taking advantage of the opportunities that are identified as a priority.

CYO is committed to comply with the system requirements, legal requirements and other requirements to which the organization subscribes related to its environmental aspects, and is committed to continuously improve the effectiveness of the management system, including

---

the prevention of pollution and the improvement of environmental performance throughout the life cycle of our products and services.

In order for all this to be accomplished, CYO's General Management provides the necessary material and human resources.
